**Egyptian Young Statisticians Association (EYSA)**

**Background**

The Egyptian young statisticians association (EYSA) was established by a group of young statisticians of CAPMAS (Egyptian NSO).

The main goal for the association was mainly to raise and spread the statistical awareness and capacities of the young statisticians through creating opportunities for scientific research on statistics and development as a core for the development process of Egypt. as well as the association is considered as a contact forum for exchanging information and experience among young statisticians.

**Vision**

To be a pioneer in the renaissance process of the Egyptian young statisticians and raising their capacities to be capable of improving and achieving better quality for produced statistics and leading the statistical work in Egypt in the future.

**Mission**

The EYSA is looking forward to develop a pool of Expertise of EYS in the core areas of statistical production, and to integrate the EYS in all country-based statistical capacity building initiatives and programs inside and outside Egypt.

**Objective**

- Developing and qualifying the future experts and young professionals to be a contact point between CAPMAS, and other data producers.
- Improving and raising capacities for the EYS in producing high quality statistics which will be used in the decision making process.
- Creating contact channels and enhancing of data and information exchange process among EYS and experts at the national, regional and international level.
- Creating a conceptual framework for continuous learning and building knowledge in the field of scientific research and statistics.
- Technical support for the EYS and enhancing their capacities in writing scientific papers, and participating in local, regional and international events, forums and conferences.
- Strengthen and enhancing relations and links with all associations, organizations and relevant stakeholders in the field of statistics.
- Raising the statistical awareness for all workers in the statistics field.
