ISI REGIONAL STATISTICS CONFERENCE:
Statistical Science for a Better Tomorrow

Extension of Deadlines for
Call for Proposals for Invited Sessions and
Submission of Contributed Papers

Conference Location: Bank Negara Malaysia, Kuala Lumpur, MALAYSIA
Conference Dates: 16-19 November 2014

The ISI-Regional Statistics Conference 2014 (ISI-RSC 2014) is being organised by the ISI and its South East Asia Regional Network, in collaboration with Bank Negara Malaysia (Central Bank of Malaysia), Department of Statistics Malaysia and the Malaysia Institute of Statistics.

The theme of the conference is “Statistical Science for a Better Tomorrow”. The conference will bring together about 500 statisticians and practitioners from all fields, whether industry, academia and government, or students, researchers and policymakers, to share insights on the application of statistical science for discovery, innovation and policy making to create a better tomorrow.

The Scientific Programme Committee is now calling for proposals for the Invited Sessions and submissions of Contributed Papers. The conference theme, “Statistical Science for a Better Tomorrow”, is intentionally broad to allow for a diverse programme and attract participants with diverse interests. We encourage researchers and practitioners who are actively involved in statistical science in academia, industry, national statistical offices, national and international agencies, central banks, and other groups to participate in the conference.

In view of the strong interest and continuous enquiries being received by the Organising Committee from potential contributors and participants, deadlines for Call for Proposals and Papers for the conference have been extended:

Invited Sessions Proposals: 30 June 2014
Contributed Papers: 15 July 2014

For further information on the submission requirements and procedures for Invited Sessions and Contributed Papers, kindly visit the Scientific Programme page on the ISI-RSC 2014 website (www.isi-rsc2014.my) or contact the Scientific Programme Committee at programme@isi-rsc2014.my.

We are also pleased to announce that a limited amount of travel support is available to participants from developing nations (see http://www.isi-web.org/isi-wscs/funding/5-root/root/81-developing for the list of developing countries). The support is made available by the International Statistical Institute which receives funding from The World Bank Trust Fund for Statistical Capacity Building.

We would also appreciate if you can share this information with your colleagues and other potential participants. We look forward to meeting you in Kuala Lumpur.

On behalf of the Organisers:
